 * What is the minimum & maximum, Avg film length $\rightarrow$

Formula:-
SELECT

MIN (length) as min-length,
MAX (Length) as max-length,
round (AVG (length), 2) as avg-length from film;

a) * What is the AVG length by rating

formula :-

Select rating, avg (length) from film
Group by rating;

* How many film have a rental rate duration of 3 days, 4 days, 5 days, 6 days, and 7 days.

formula :-

select rental_duration as rental-days,
count (*) as total-movies from film
Group by rental-duration
Order by rental-duration;

* Which film has the longest length.

Formula:-

```
select title, length from film
order by length desc limit 1;
```

* What are the ~~movies~~ top 10 longest films.

Formula:-

```
select title, length from film
order by length Desc limit 10;
```

* What are the top 10 movies with highest rental-rate.

Formula:-

```
select title, Rental rate from
film order by rental-rate Desc
limit 10;
```

Using sakila / Film

Use sakila :

1) Total = no

select count (*) AS total-film from film;

2) select count (Distinct title) AS unique-title
from film ;

3) SELECT MIN (length) AS min-length ,
MAX (length) AS max-length .

Round (AVG (length), 2) AS AVG-length from film ;

4)

Different Rating —

select Distinct rating from film ;

no. of film by count rating —

select rating, count (*) AS film-count
from film group By rating ;

* release-year —

select release-year, count (*) AS
total-count from film

group By release-year ;

Avg film length By rating —
 Select rating, AVG (length) AS
 Avg-length from film
 Group By rating ;

select rating, Round (AVG (length), 2)
 AS avg-length from film
 Group By rating ;

No. of film By Rental ~~rate~~ Duration —
 select rental-Duration, count (*) AS film count
 from film Group By rental-duration ;

Longest —
 select title, length from film
 Where length = (select MAX (length) from
 film);

Top 10 —
 select title, length from film
 Order By length DESC limit 10 ;

26) select title, length from film
where (length > (select AVG(length) from
film)) order by length DESC;

select title, length from film
where (rental-rate > (select AVG(rental-rate)
from film));

AVG Rate for each Rental Duration —
select rental-duration, AVG(rental-rate)
from film group by rental-duration;

select rating, AVG(length) from film
group by rating
order by AVG(length) DESC limit 1;

30) select rating, count(*)
from film
group by rating order by count(*)
DESC limit 1;

31) select title, length, rental-rate from film
where length > (select AVG(length) from film) And
rental-rate > (select AVG(rental-rate) from film)
